FAQ2-1

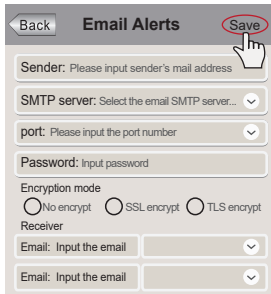

FAQ2-2

Step1-2: Enable "Motion Detection Alarm" and "Alarm Switch" as FAQ2-3

FAQ2-3

FAQ2-4

Step2: Choose motion detection alarm notification types

There are 3 types you can choose to get the alarm notification.

• Phone push alarm

Enable "Receive Notifications" then the camera will push notification to your smart phone when an alarm is activated. Push notification account is default as the ifcam app login account. If don't need this function, you can delete the push account.

• Buzzer alarm

Enable "Buzzer Alarm" then the camera's buzzer works when an alarm is activated.

• Email Alerts

The alarm notification will send to your designated email address.

Tap " Email Alerts", and fill in the email information as below guide

1. Sender: Please input your email address (e.g., Lucy@gmail.com).

2. SMTP server: The server address for the Sender's email account.

3. Port: Please select 587 or 465 if the SMTP address is mtp.gmail.com, Smtplib.mail.yahoo.com or smtp.live.com(Hotmail.com). If not, please select 25.

4. Password: input password

5. Email: Enter up to three receiving email accounts (e.g., you may have both Lucy@gmail.com and Marcy@yahoo.com) as picture FAQ2-4

If failed to setup Email Alert, please activate your Gmail or Yahoo Email account.
